

## Keep your wedding memories growing

If you want something a little bit different to give your guests at the end of your wedding day, or perhaps want a keepsake of your own, then you'll love this new idea from **Philippa Craddock**.

The new company claims to be the only one in the UK to offer high-end indoor and outdoor plants, beautifully packaged and delivered to your wedding venue. After the day is over the plants can be taken away by guests or by the bride and groom and planted in their garden's as a reminder of the day.

A representative for the company told us: "We have recently completed a wedding design where we used miniature [rose](#) bushes and potted herbs throughout the arrangements. The roses and herbs will be replanted to create a special herb and rose garden in the bride and groom's garden."

And those that want to add an ethical twist to their day without going too far, will love the fact that the company uses 100% recyclable packaging. It also donates 2.5% of its profits the Growaforest charity, which plants native trees in the UK to help reverse the damage done by CO2 emissions.
